

a **Utah arrays in motor cortex**

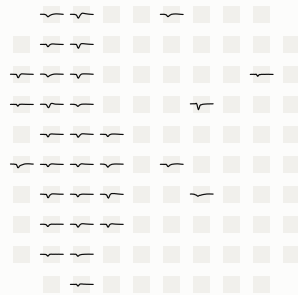

Hand area, left hemisphere. Participants T5, T6 and T9
and monkeys N, C and M, 1.5–7.3 years each

**b**

Mean spike waveforms on one array (participant T5, 10 × 10 grid, 400 μm pitch)

Day 40

58 of 96 electrodes with spikes

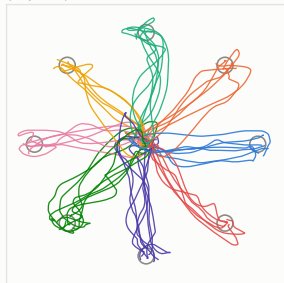

Day 2,700 (7.3 years later)

100 μV

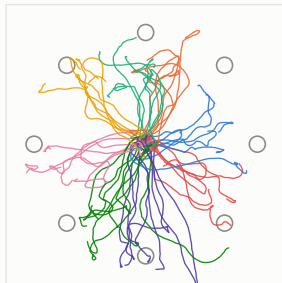

31 of 96 electrodes with spikes

c

Cursor in closed loop
(day 833)

**d**

Same-day decoder
 $R^2 = 0.56$

Decoder from 478 days earlier
 $R^2 = -0.28$

Same decoder, re-weighted
 $R^2 = 0.44$
